SOFTWARE ENGINEER

Backend engineer with 3+ years of experience building scalable Web3 services, RESTful APIs, and microservices. Currently completing a B.Sc. in Computer Science at Federal University of Technology, Minna (GPA: 4.39/5.0). Proficient in Go, Node.js, TypeScript, PostgreSQL, and Docker.

TECHNICAL SKILLS

Languages: TypeScript, Python, Rust, Go, SQL, Bash **Frontend:** React, Svelte, Next.js, Tailwind CSS, Web Components **Backend:** Node.js, FastAPI, PostgreSQL, Redis, GraphQL, REST APIs **Infrastructure:** AWS (ECS, Lambda, RDS, S3), Kubernetes, Docker, Terraform, GitHub Actions **Tools:** Git, VS Code, Linux, Datadog, Grafana, Vitest, Playwright, pytest

PROFESSIONAL EXPERIENCE

Backend Engineer | Uptime Tech | Lagos, Nigeria | Apr 2026 - July 2026

- Developed and integrated a predictive maintenance AI feature, enabling proactive system monitoring and reducing unexpected downtime. - Built and maintained RESTful API routes to support core platform functionality and service reliability. - Wrote and maintained automated tests, improving code coverage and reducing regression bugs in production.

Web3 Backend Engineer | Kat's & Co, Web3 Solutions | Remote, Canada | Jan 2024 – Feb 2026

- Designed and maintained backend infrastructure handling 1,000+ monthly on-chain interactions with 99% transaction success rate. - Built and deployed scalable Web3 services and smart contracts, eliminating 70% of manual processing overhead. - Architected CI/CD pipelines and automated Linux deployments, cutting release cycles by 60% and production error rates by 40%. - Collaborated cross-functionally with product and frontend teams to translate requirements into reliable, production-grade systems.

Backend Engineer | Freelance | Lagos, Nigeria | Feb 2021 – Nov 2023

- Built Go and Node.js microservices and RESTful APIs serving 2,000+ users, improving response times by 35%. - Optimized database queries and backend performance, reducing latency by 30% and error rates by 25%. - Maintained PostgreSQL and SQLite-backed services with a focus on reliability and data integrity. - Provided technical guidance and code review to collaborating developers on shared projects.

PROJECTS

ProTask API | NestJS, PostgreSQL, Prisma, JWT, BullMQ, Redis, Docker

Architected a multi-tenant team task management REST API with full RBAC across 6 normalized tables — users, teams, projects, tasks, and comments. Implemented JWT authentication, role-based guards, and team invite flows with scoped access control. Designed complex many-to-many relationships with Prisma ORM and added activity logging, pagination, filtering, and rate limiting.

PayFlow API | NestJS, PostgreSQL, Prisma, Paystack, BullMQ, Redis, Docker

Built a SaaS payment and subscription backend with Paystack integration, webhook handling, and plan-based feature gating. Implemented idempotent webhook processing to safely handle duplicate payment events and designed subscription lifecycle management.

EDUCATION

B.S. Computer Science | University of Technology | 2024

OPEN SOURCE & COMMUNITY

- **Contributor:** Logos scripting language — built the package manager CLI and test runner - **Creator:** Logos LGS — VSCode extension (syntax highlighting & language support) published on VS Marketplace - **Contributor:** Avalanche Builders Hub — documentation bug fixes and updates - Local Meetups (12+ talks)
